Places to visit on Harishchandragad Trek

1. Harishchandragad Kokan Kada

This interesting cliff faces west and provides views of the surrounding region. The cliff has an overhang, but many times it's been climbed by curious explorers like yourself! Sometimes a circular rainbow can be seen from this point, a rare phenomenon that happens when there is mist in the valley, and you're looking straight at its source, i.e., behind someone. One cool thing to look out for here are vertical cloud bursts: When approaching cliffs or mountain ranges with low-lying clouds above them on windy days, if these clouds get sucked into pockets below, they may shoot vertically upwards more than 50 feet, so keep your eyes peeled for those as well! Harishchandragad Trek in winter is popular among hikers; you get excellent views from the Kokankada.

2. Saptatirtha Pushkarni

On the east side of Harishchandreshwar temple is a beautiful small lake, originally a potable source of drinking water. However, due to recent trekkers who have been throwing their garbage in it and because plastic cannot be destroyed by sunlight, this once-potable water no longer has any drinkability. Locals usually swim here during the monsoon season and winters Making it unusable for drinking. A few years ago, at the Saptatirtha Pushkarni, there were many lakeside idols dedicated to various Gods such as Vishnu. But now, these deities have been moved to nearby caves for protection from the elements and tourists.

3. Kedareshwar Cave

At your right, as you approach Harishchandreshwar temple, there is the huge cave of Kedareshwar, in which a big Shiva Linga stands. It's surrounded by ice-cold waist-deep water. The height from base to top measures five feet, and it can be hard for pilgrims to reach due to the icy cold water. But that doesn't stop them! There are sculptures constructed out in the cave. It is sometimes difficult to reach Kedareshwar cave in the rainy season, as a river flows over the way.

This is the origin of River Mangalganga. There were four pillars erected encompassing the Shiva Linga to maintain the cave. Now only one Pillar is standing. Though four pillars were surrounding the Linga, presently, there is just one Pillar unimpaired. Locals believe the pillars to be representatives of yuga or time, namely, *Satya*, *Treta*, *Dvapara* and the *Kali Yuga*.

4. Caves on Harishchandragad

The natural caves that make up the fort are scattered throughout and give refuge to exhausted adventurers. Some of these can be located near dhabas, some far away in forests unexplored by outsiders but known well to locals. The most magnificent cave is situated on a hillside not too close, or far from Saptatirtha Pushkarni at 30 feet deep and with many entrances, so it's easy for anyone who enters time again to find their way back inside after exploring outside.

Earlier trekkers would stay in these caves during the rainy season and winters. With many Dhabas coming up who offer Harishchandragad camping services, very few people now stay in the caves while trekking.

5. Pachnai Village

www.treksandtrails.org

@Harishchandragad

Pachnai village is located 210 kilometres from Mumbai. The main source of income for villagers is running restaurants at the base village, dhabas along the route, food and camping on the Harishchandragad mountain for trekkers and pilgrims. It is located at an altitude of 2592 feet above sea level. During the monsoon season, the village is surrounded by beautiful waterfalls. Post monsoon rice fields can be seen everywhere. It has a lot of wildlife. Pre-monsoon is famous for fireflies spotting. Though the total road distance is around 210 km, it will easily take 6 to 8 hours to reach the village. The roads leading to the village are in bad shape and constantly under repairs due to damage done by heavy rainfall each year. Spending a day exploring the nearby waterfalls and staying with at local homestays is recommended.
